REMARKS

Claims 21-63 are currently pending in the present application. This amendment is presented as a result of an agreement reached between applicant's representative, Examiner Mahatan and Examiner Murphy in a telephone interview conducted on June 14, 2005. During the telephone interview, all claims were discussed in view of the sole outstanding enablement rejection. The most recent Advisory Action was also discussed. The applicant proposed to limit all claims to the HIV virus, rather than a viral disease to overcome the enablement rejection. During the interview it was agreed that the sole outstanding rejection would be overcome by limiting claims 21-63 to the HIV virus, rather than a viral disease, in view of the Examiner's indication in the most recent Advisory Action that claims 21-63 are enabled for HIV. This amendment implements the agreement made during the telephone interview thereby overcoming the sole outstanding rejection.

In view of the foregoing amendments and remarks, favorable consideration, withdrawal of the sole outstanding rejection and issuance of a Notice of Allowance are requested.

Respectfully Submitted,

Kevin J. Dunleavy
